BOLT HEAD AND EXPORT INFO

Bolt head for R8:	<input type="checkbox"/> should be ordered Bix'n Andy <input type="checkbox"/> will be sent in by the customer. Serial number of sent in bolt head: _____
-------------------	---

Prior to shipping barrel to any other EU member state than Austria, we need the acceptance of the weapons authority of the given receiving state (via Email in advance).

- 1) In case of an R8 barrel, we need a bolt head out of license/legal reasons. The bolt head can be ordered by us or brought in by you. If you plan to bring in the bolt head, we will not need it until the barrel is ready for proofing (We will inform you).
- 2) For Blaser barrels we provide original Blaser contours. More information about barrel contours can be found in the separate information document.
- 3) Is measured from the muzzle to the bolt face. For Blaser barrels, we measure the total overall length like Blaser.
- 4) The identification should be read like this: (Thread outer diameter)x(lead). The muzzle thread should be about 2 mm smaller than the muzzle diameter. For example: Contour BSW (19 mm) → max. M17x1.
You will get a matching muzzle thread protection ring with your order.
- 4) This is a kind of bluing-treatment specifically for stainless steel. The resulting surface is not 100% the same as classic gun-bluing in terms of color depth and durability.
